CAPTERA™ FEATURES

TOUCH SCREEN INTERFACE

Everything is right at your fingertips. Use a traditional keyboard, or an on-screen keyboard for on-the-go mobility.

DICOM & HL7 COMPLIANT

Integrate with electronic patient management systems like RIS, HIS and EMR.

PATIENT SCHEDULING & MONITORING

Schedule patients and keep track of your workflow with Stat, Scheduled, In-Progress, and Finished indicators.

MULTI-TASK SCANNING

Save time by manipulating acquired images while additional images are being scanned.

EASY EXPORT TO PACS AND MEDIA

Export studies to an external drive, burn to a CD or DVD, and send to a printer.

ICE-2 IMAGE CLARITY ENHANCEMENT

Fully automated processing algorithms are applied for proper anatomy and view. Standard, soft, or sharp processing is available.

IMAGING AND ANNOTATION TOOLS

Advanced tools including: Window Level, Crop, Heart-to-Lung Ratio, Center Line, Cobb Angle, and much more.

CUSTOM SETTINGS

Create custom text annotations, imaging defaults, DICOM settings, and administrative settings. Track frequently used imaging tools.

EASY EDITING

Edit patient information, comments, studies, image views, and scheduling of patients without re-entering existing data.

SMART WINDOW LEVEL

Adjust window levels with ease using this intuitive smart tool.

DYNAMIC SEARCH AND SORT FILTERS

Search and sort data based on patient name, patient ID, physician name, exam date, and patient study status.

STRONG TECHNICAL SUPPORT

Online video tutorials, quick and courteous phone support, and in-person training options.
